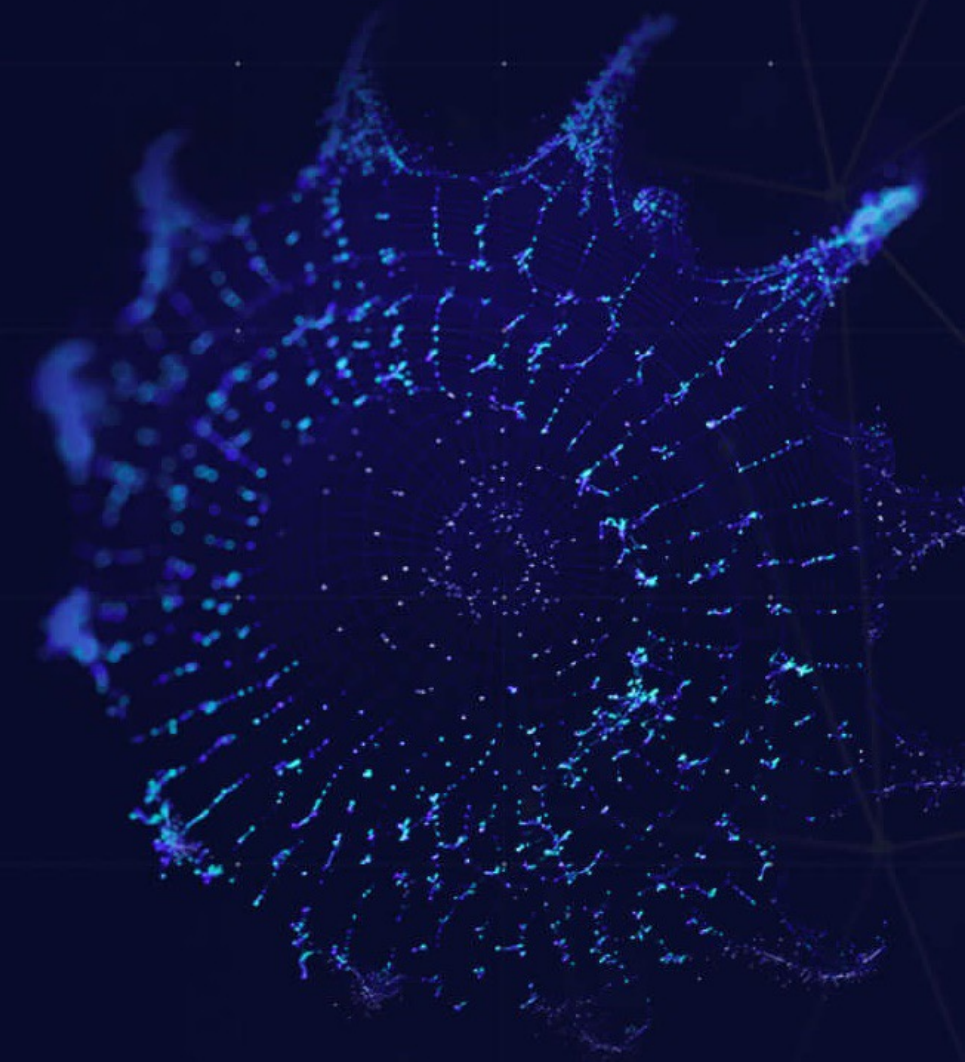
Team Introduction

PART ONE



01. Team Introduction

NnsDAO

NnsDAO Protocol

NnsDAO is simply a boundaryless autonomous organization that provides some basic modular programmable services for building the world of DAOn.

Nnsdao nomos core protocol

- DAOn DAOs constraint rules
- Virtual passport system
- Credit-based voting system

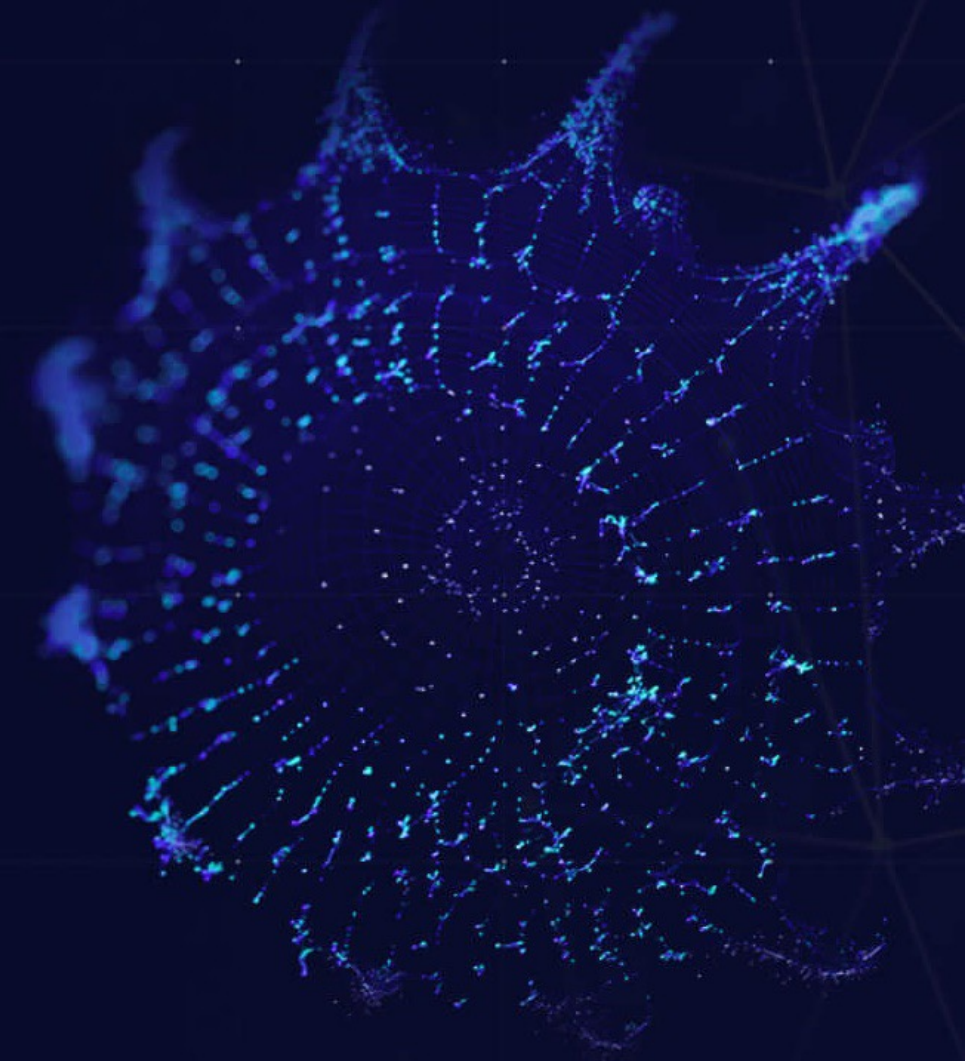
Product Matrix

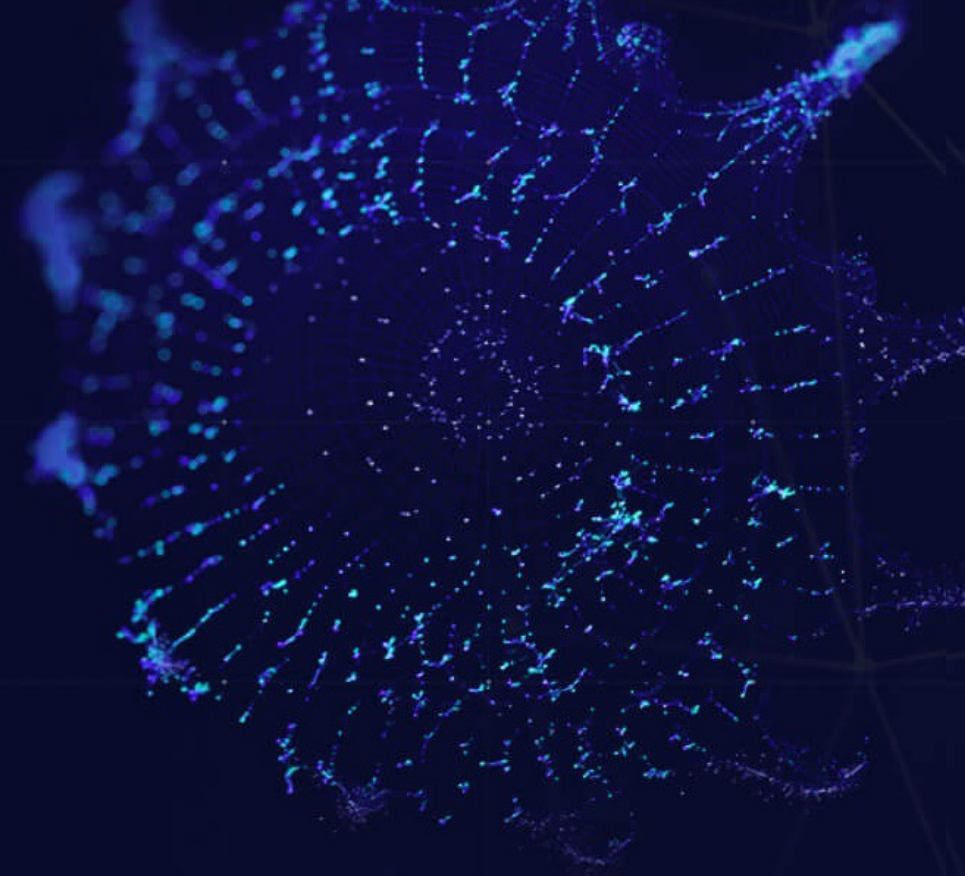
PART TWO



02. Product Matrix

NnsDAO

√	Tools on IC	Icpscan, Icpdrops, Icptree
√	GAMES on IC	Texas Holdem, Universe
√	Capital on IC	NnsDAO Capital
√	Podcast, Social on IC	ICPodcast, Anonymous Social
√	DAOs on IC	NnsDAO, Nnsdao Protocol



02. Product Matrix

NnsDAO

Tools

Icpscan - Block Browser, Watch IC Dynamics.

Icpdrops –Airdrop and project evaluation system.

Motoko Sh – Tutorials and Scripting Tools.

Icptree –The Only Link You will Ever Need.

Icpodcast –Podcast hosting & analytics platform.

…

02. Product Matrix

NnsDAO

Transactions

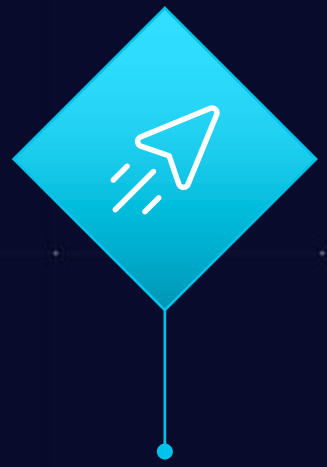
SWAP – Marketplace with built-in NFTs and Token.

On-chain data– Observe Token dynamics based on offline computing and big data.

...

02. Product Matrix

NnsDAO



Games

Texas – A completely open source Texas game that is fair, just and open.

Universe – Multi-client game, immersive NFT programmable meta-universe game.

...

02. Product Matrix

NnsDAO

Social – DAO-based reputation anonymous social

...

Social

02. Product Matrix

Governance - Reward rare NFTs for sustained significant contributions.

Virtual Credit - Generate rare NFTs based on different dimensions to show uniqueness and honor.

Game Props - Multiple scenarios for functional props, player engagement, contests, etc.

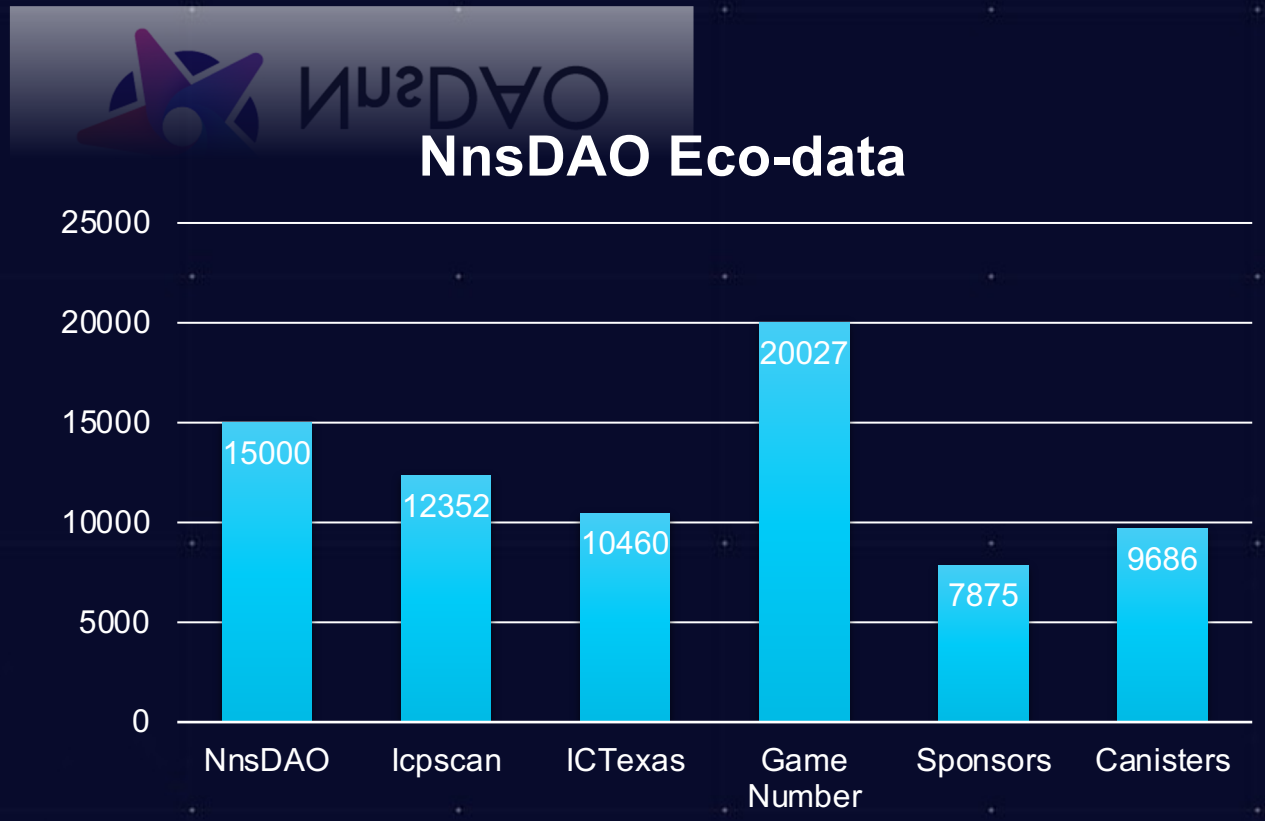
GameFi Collateral Lending - Combination of game and Defi, gradually realize collateral chip lending and virtual credit lending scenarios.

...

02. Product Matrix

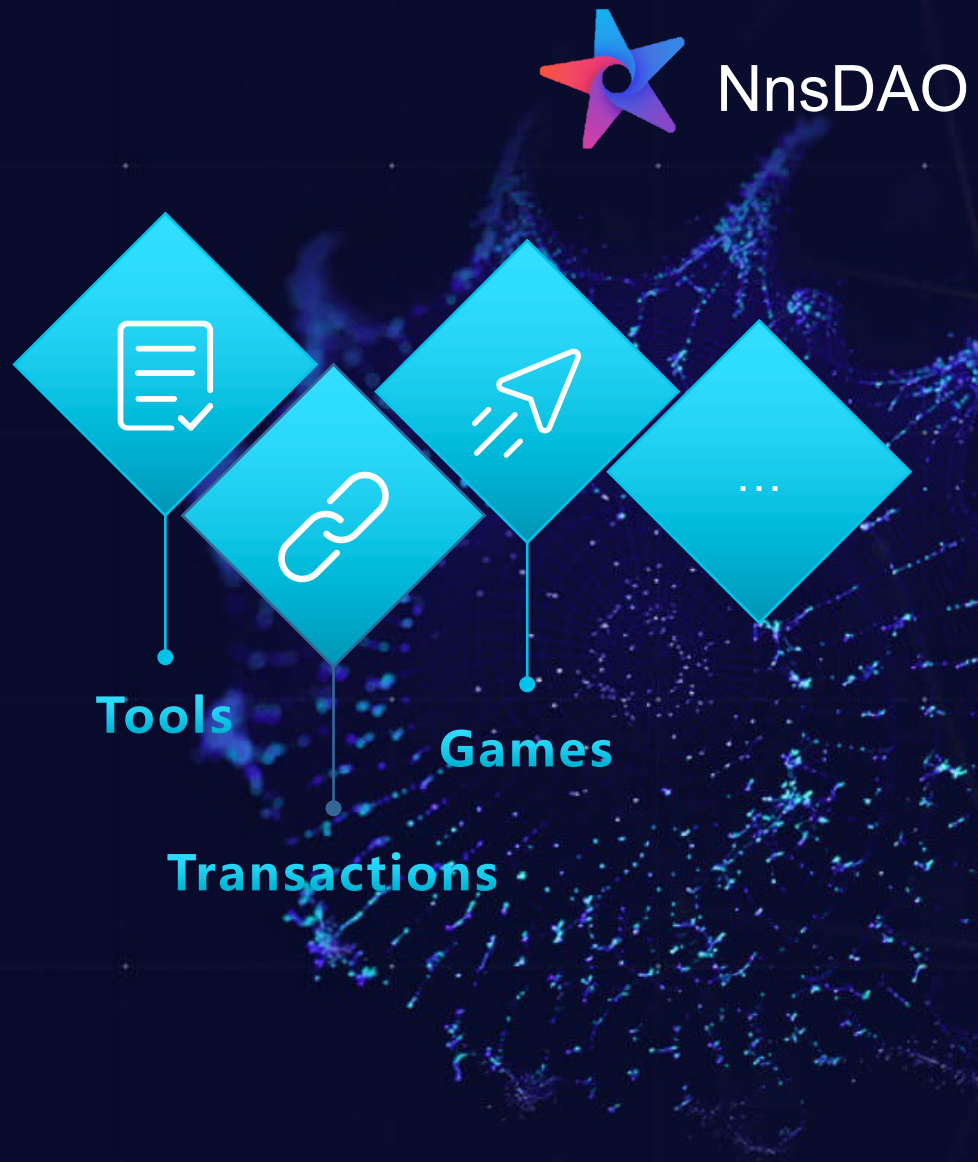
NnsDAO

NnsDAO



DATA

02. Product Matrix



Virtual credit system (business card) - different identity symbols for participants in the organization

Governance - Bottom-up governance based on Nomos Core and virtual reputation constraints

DAOn, DAOs - participation in different DAOs based on the user's continuous contribution and reputation accumulation

...

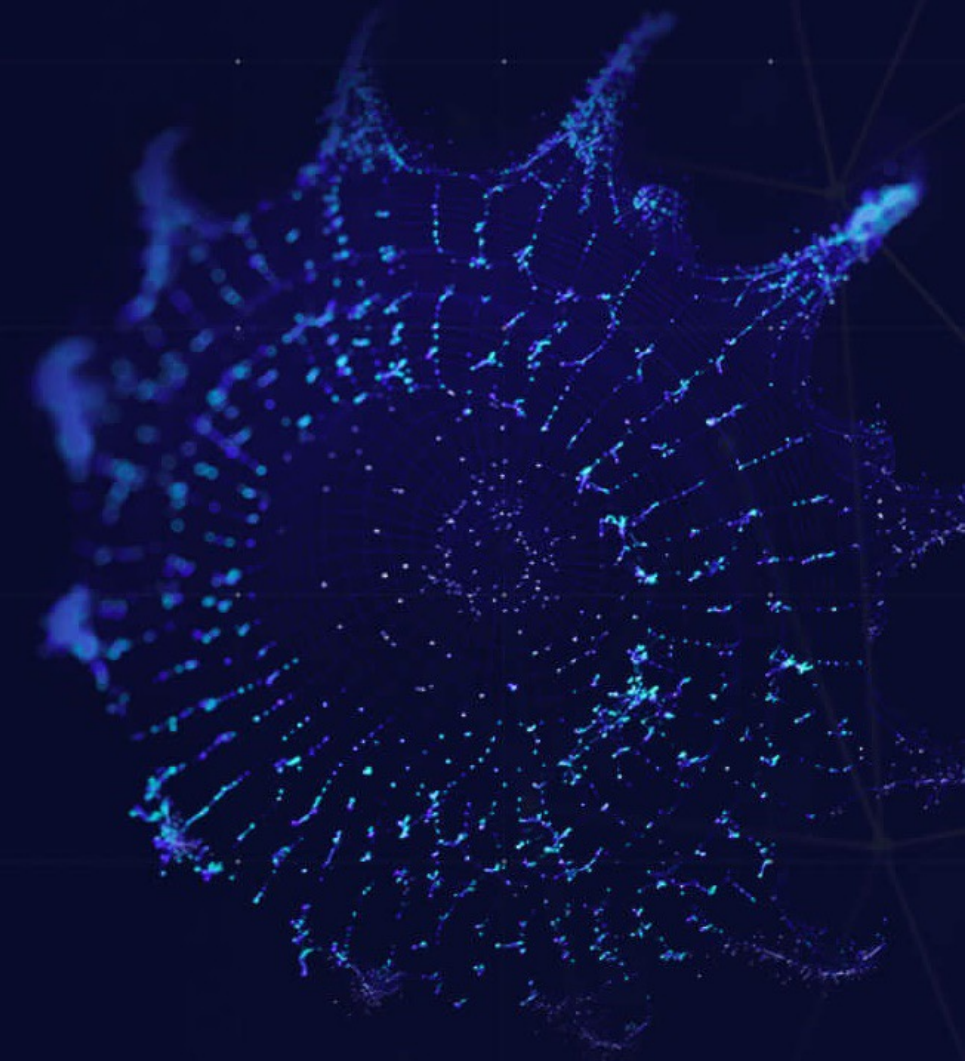
Finance model

PART THREE



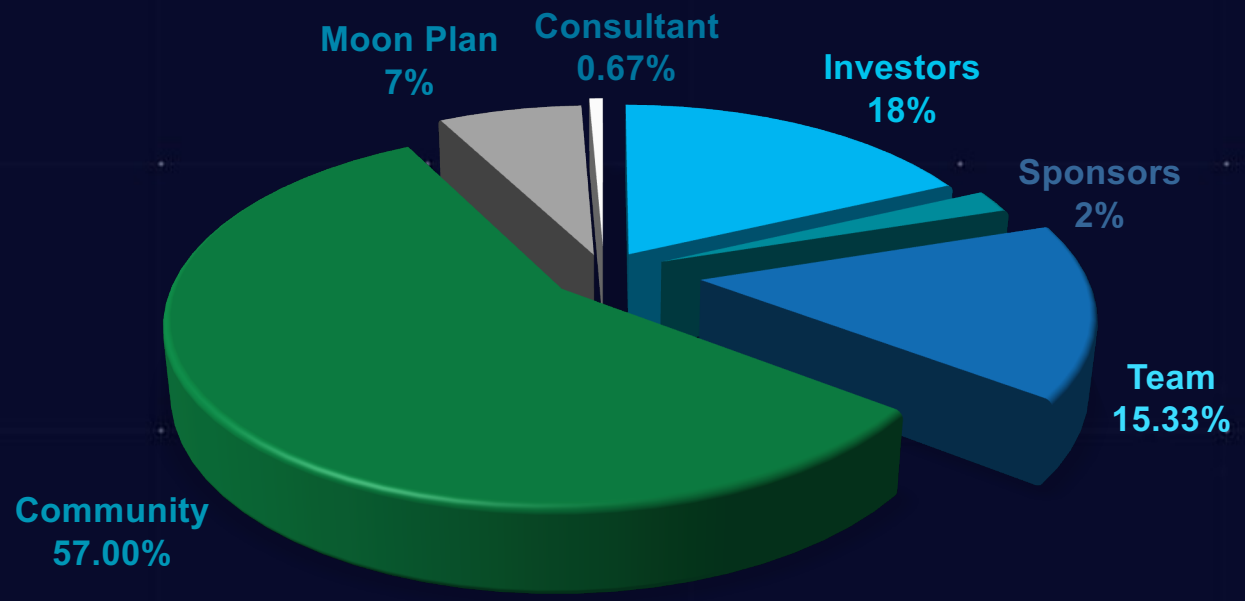
03. Finance model

NnsDAO

Token Name: NnsDAO Protocol

Total Supply: 100 million

Symbol: NDP



03.Finance model

NnsDAO

Our Advantages:

1. Icpscan and ICTexas have over 10,000 cumulative users.
2. The product matrix is constantly improving and expanding the user base, Icpdrops, Icptree, ICPodcast, Universe and other products are being accelerated.
3. We have received official support from Dfinity's dual Grants, Texas and Icpscan.
4. A new virtual credit system for the WEB 3.0 era to achieve DAO governance.
5. NFTs, Marketplace and other trading markets will all be launched by the end of the year, and Texas games will be partially profitable.
6. Based on the credit system, new scenarios such as GameFi chip collateral lending and DeSo anonymous social will be launched in the future.

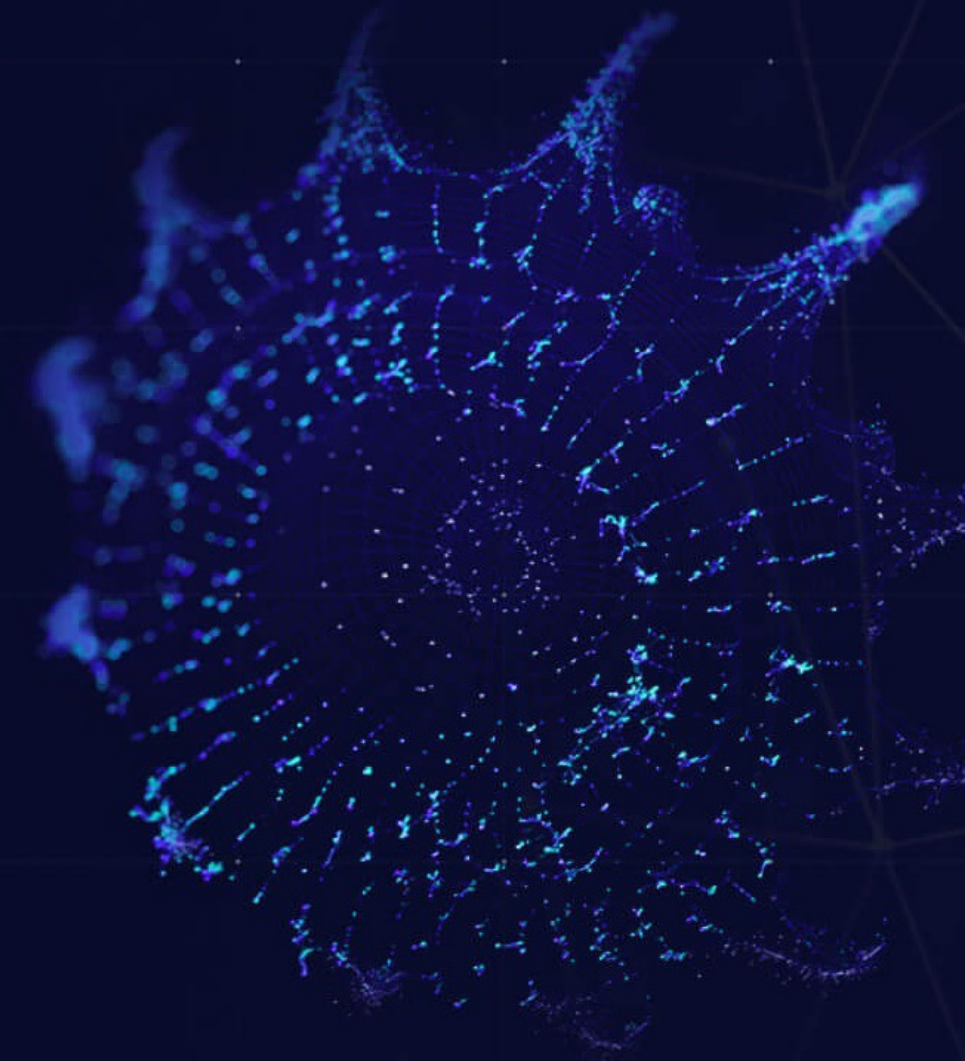
NnsDAO grows the sustainability and scalability of the platform by connecting the IC ecology with II and implementing different DAO governance.

NnsDAO

04

Milestone roadmap

PART FOUR



04. Milestone roadmap

NnsDAO

Phase I (Current)

Basic functions and services: Icpscan, Drops function implementation, Icptree, ICPodcast, Social, Texas, Universe and other projects launched.

Phase II

NnsDAO virtual credit system, NFTs props, game collection platform creation, TokenSwap and Marketplace features are launched.

Phase III

NnsDAO Nomos Core was launched to encourage the opening of more DAOn, and DAOs , DAOs moon landing plan implementation.

NnsDAO

T H A N K S

We look forward to speaking with you!

Kind regards,

The NnsDAO Labs Team.
