

The next generation of blockchain consensus is DAO

GameFi

DAO

Play to earn

DAOs to earn

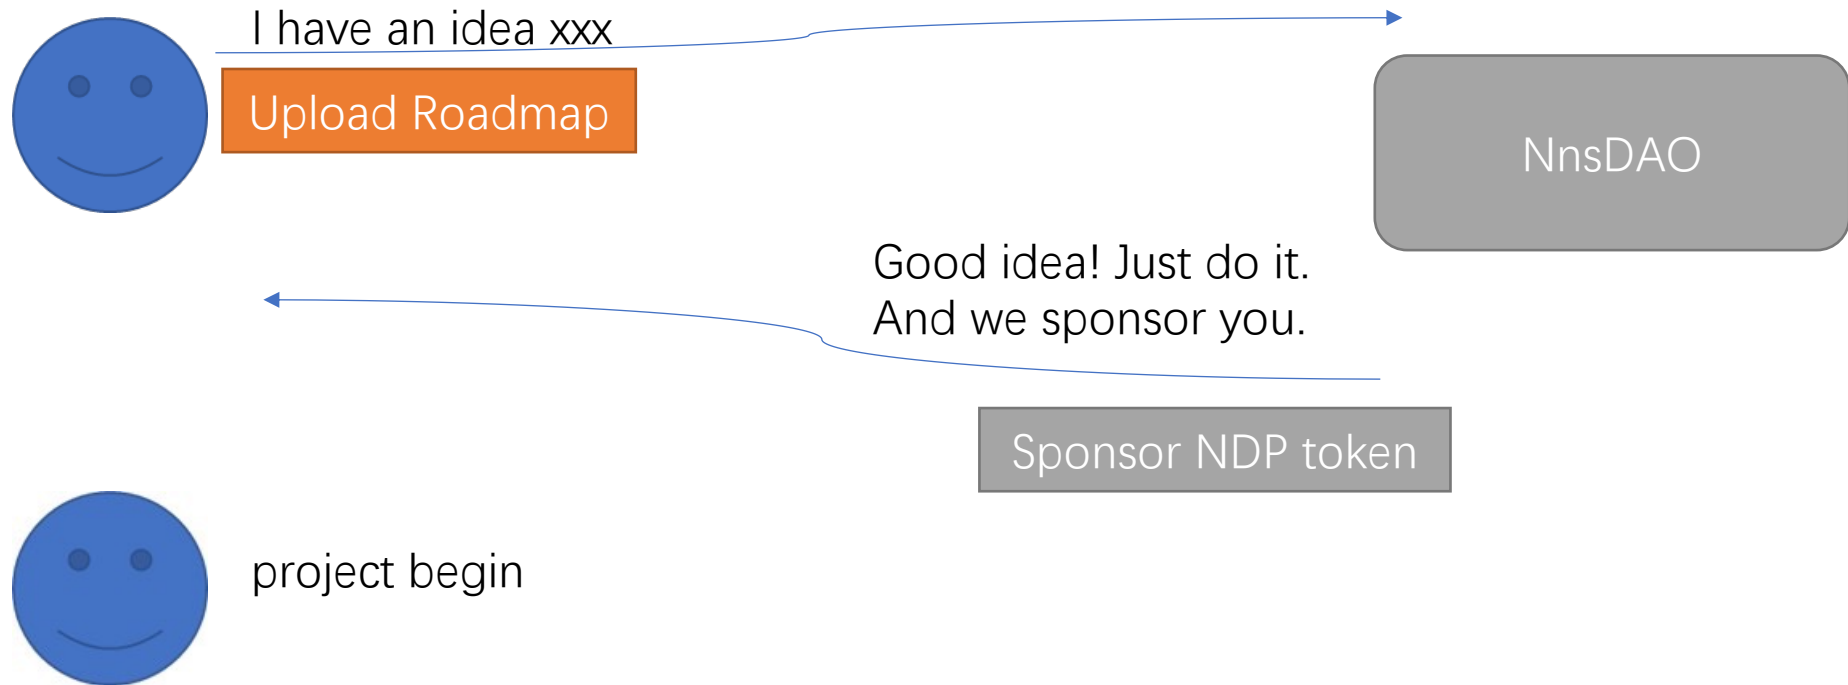

Play to earn = We are all Junior Workers

DAO to earn = You can be a boss, you just work for yourself.

We encourage everyone who contributes to the community(NnsDAO ecologies), the more contributions they make, the better and continuous rewards they can get.

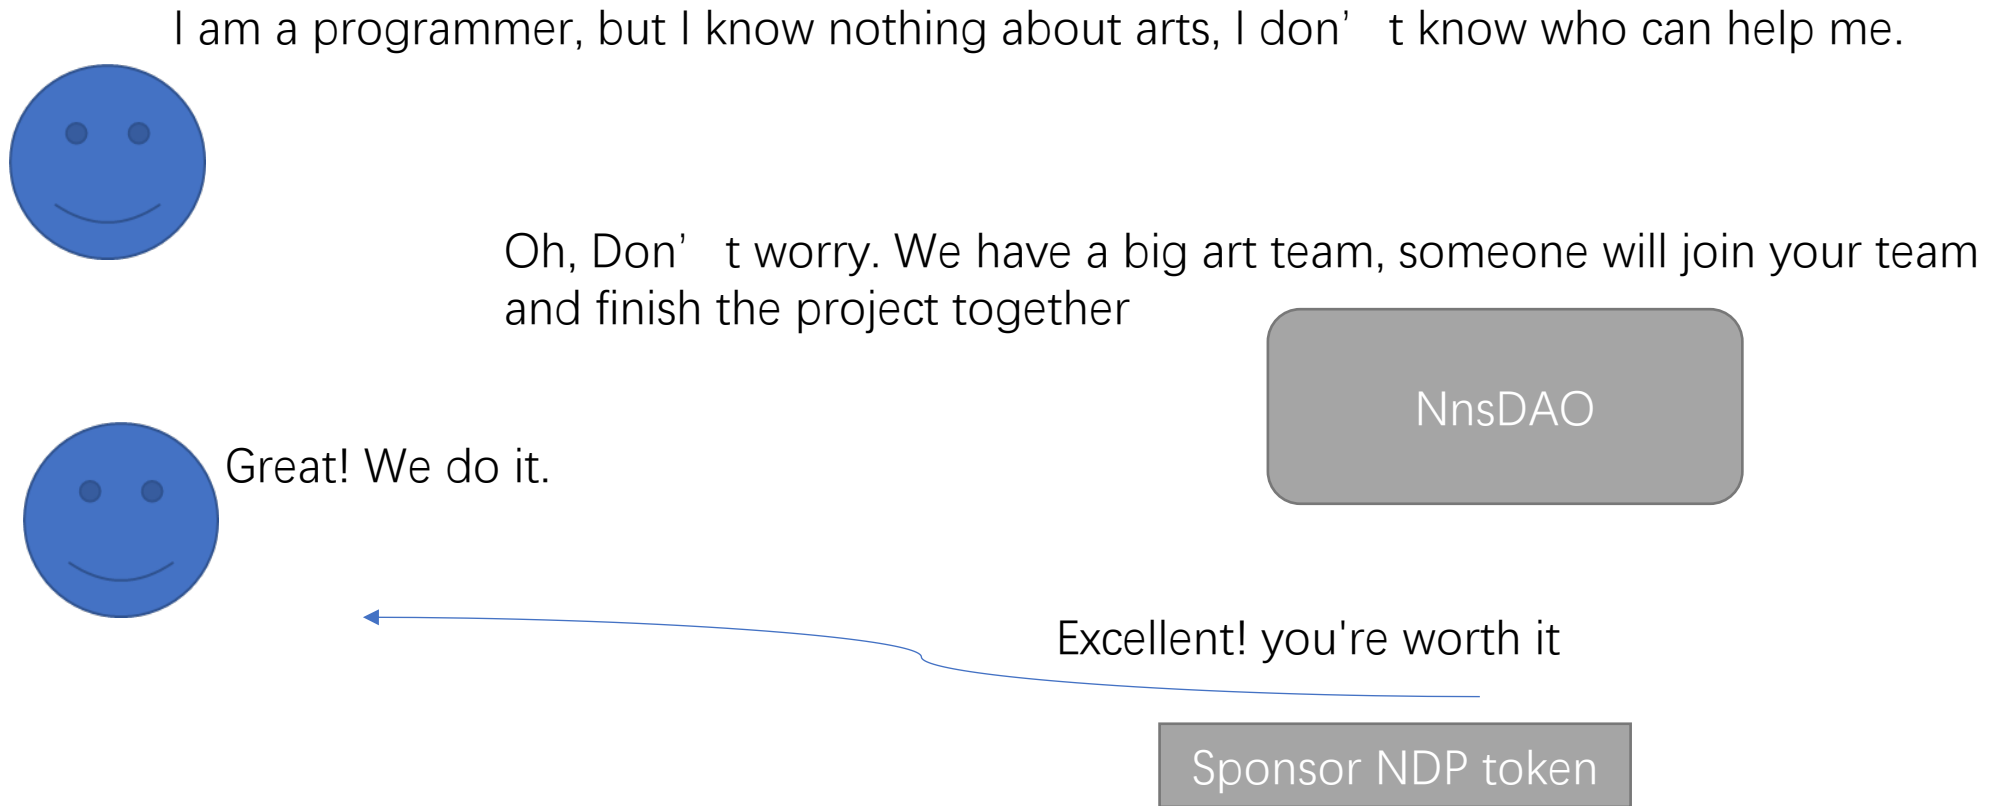

NnsDAO : Contribute to earn

1. What to Contribute? We need Everything good for DAO

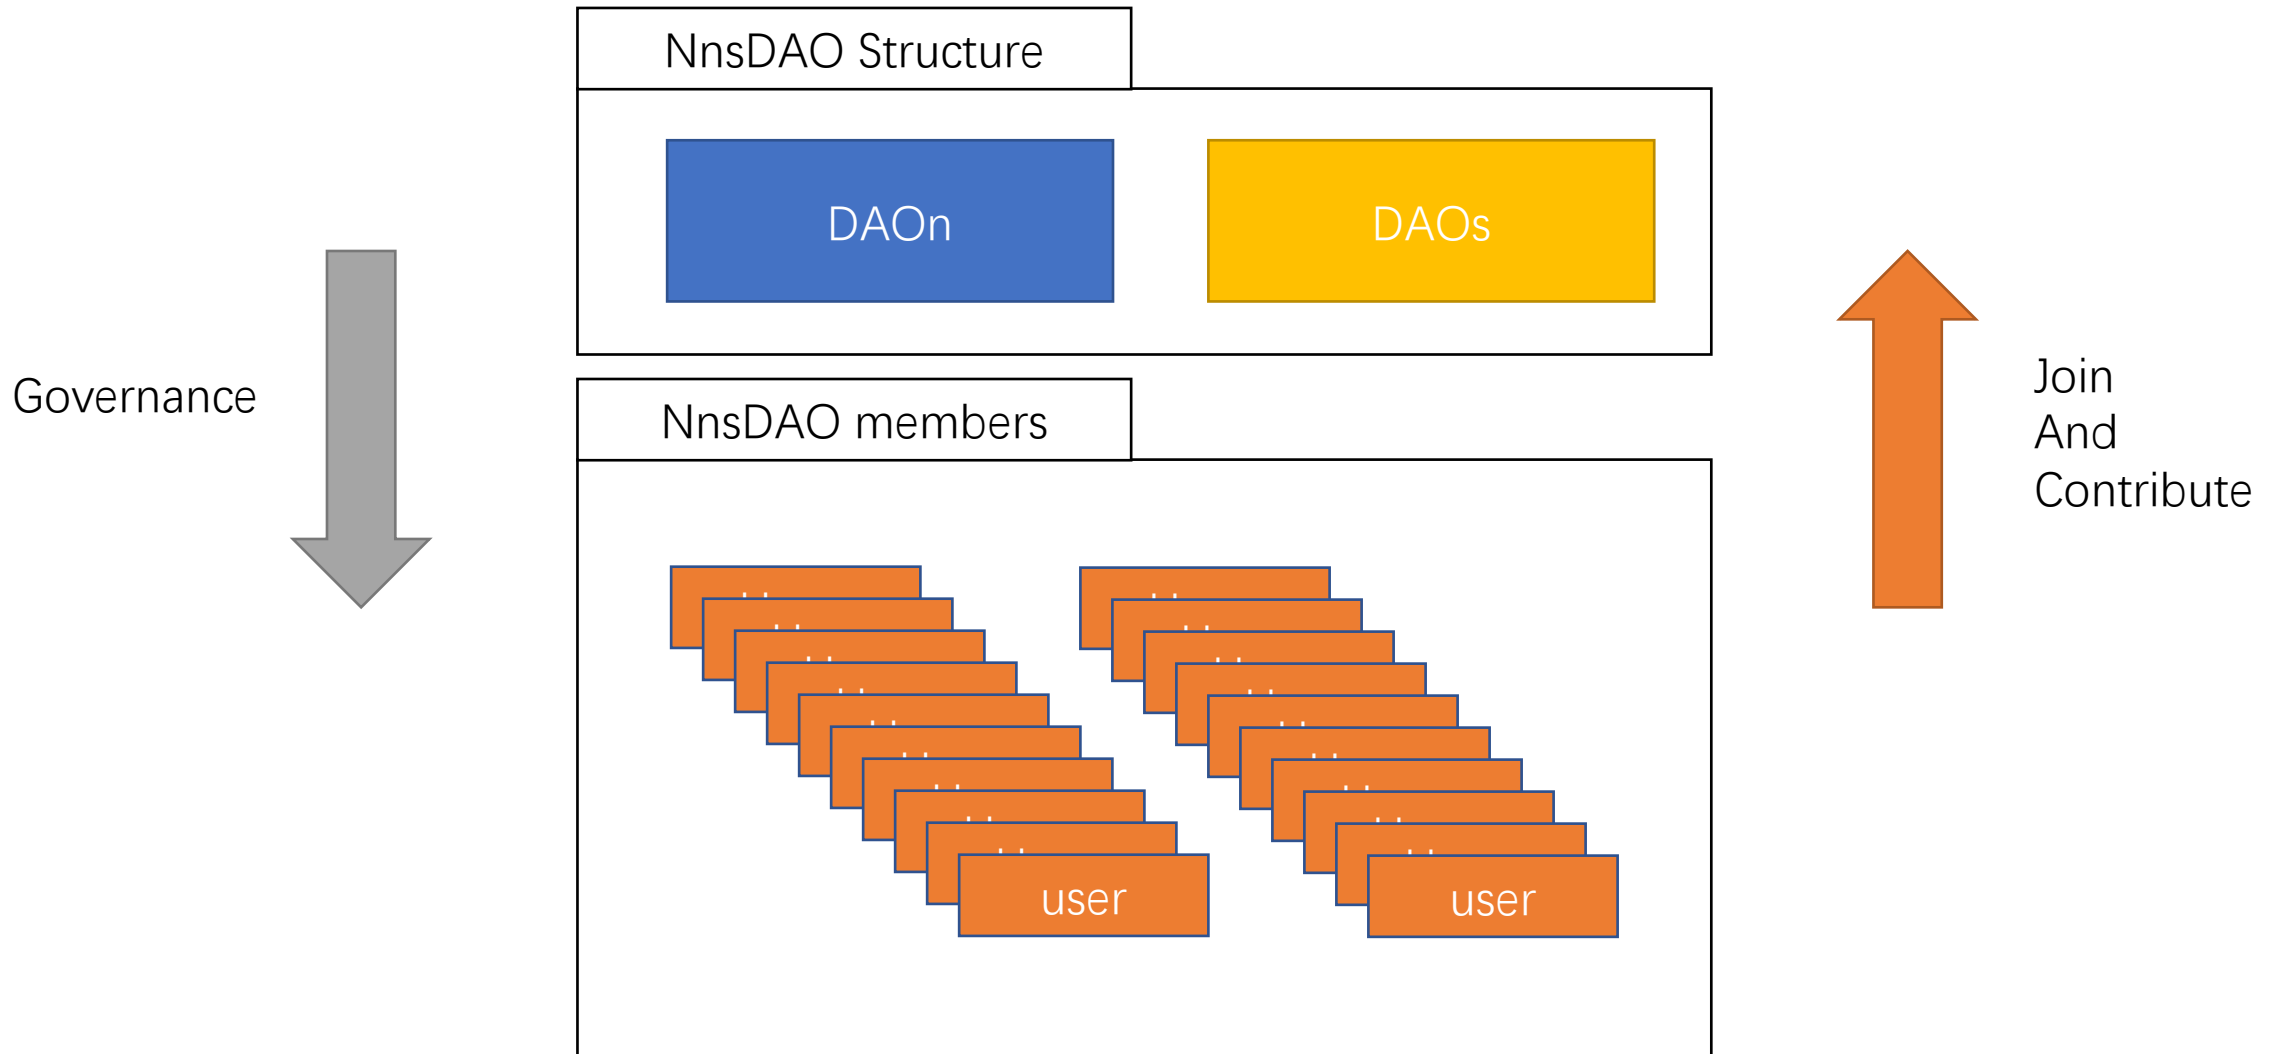

NnsDAO : Contribute to earn

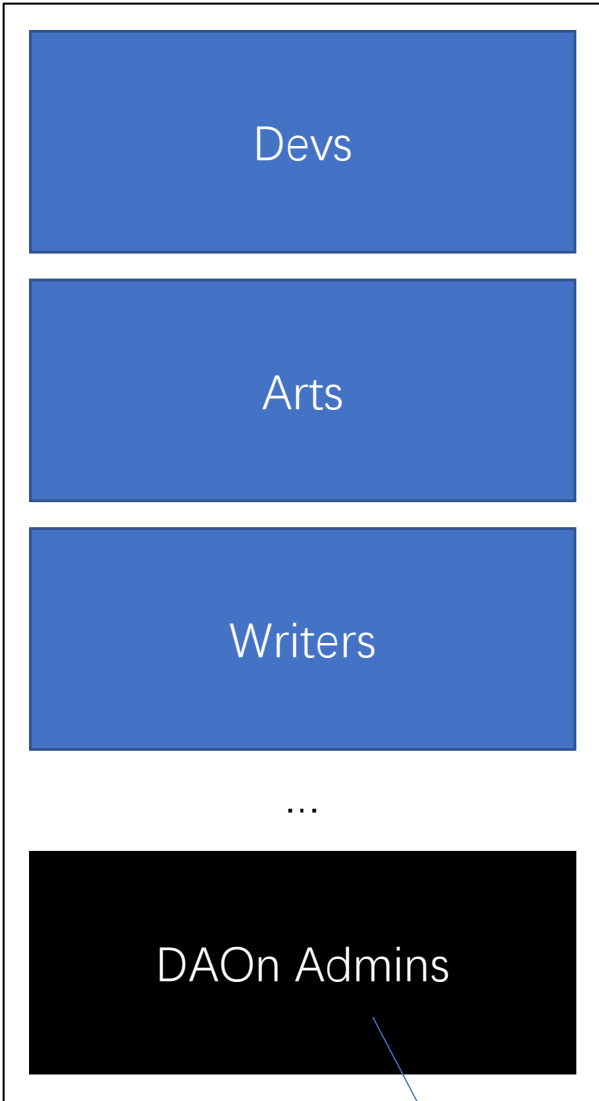

2. Who can Contribute? We need Everyone.

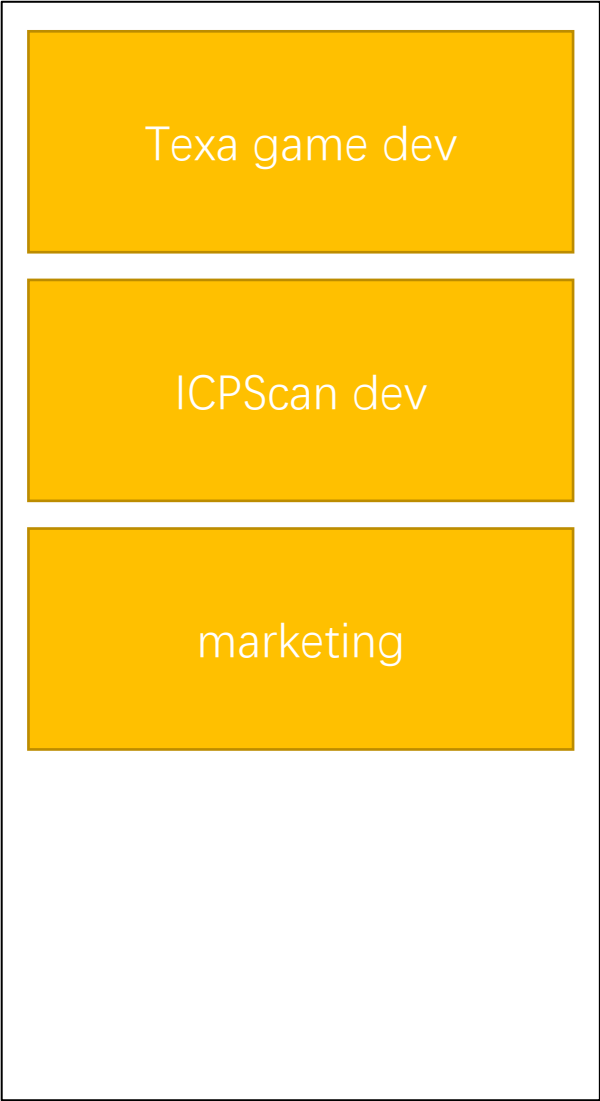

NnsDAO : Architecture

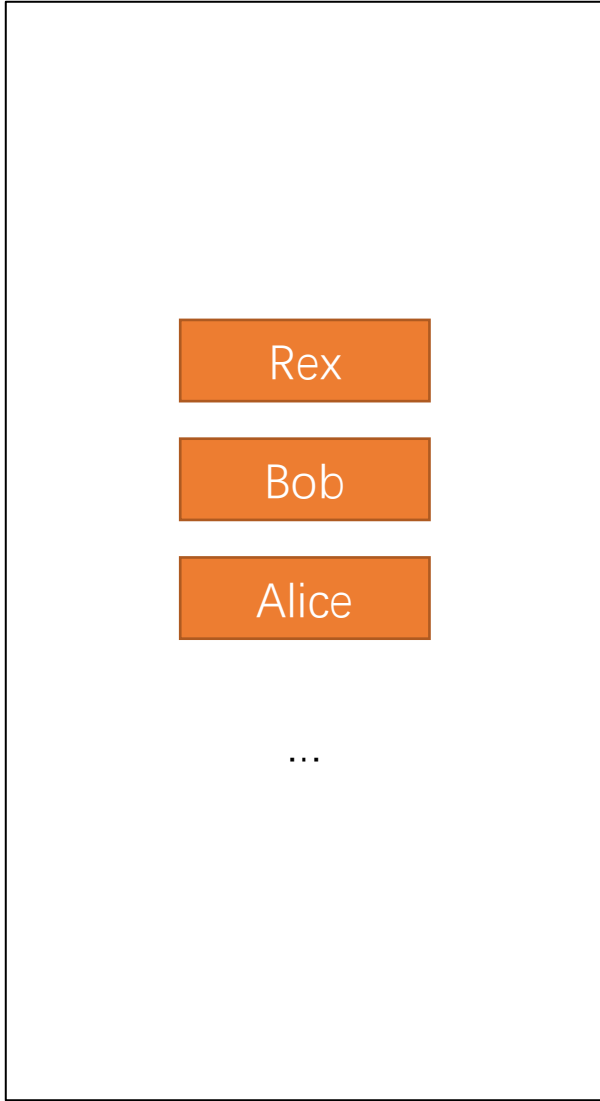

DAOOn

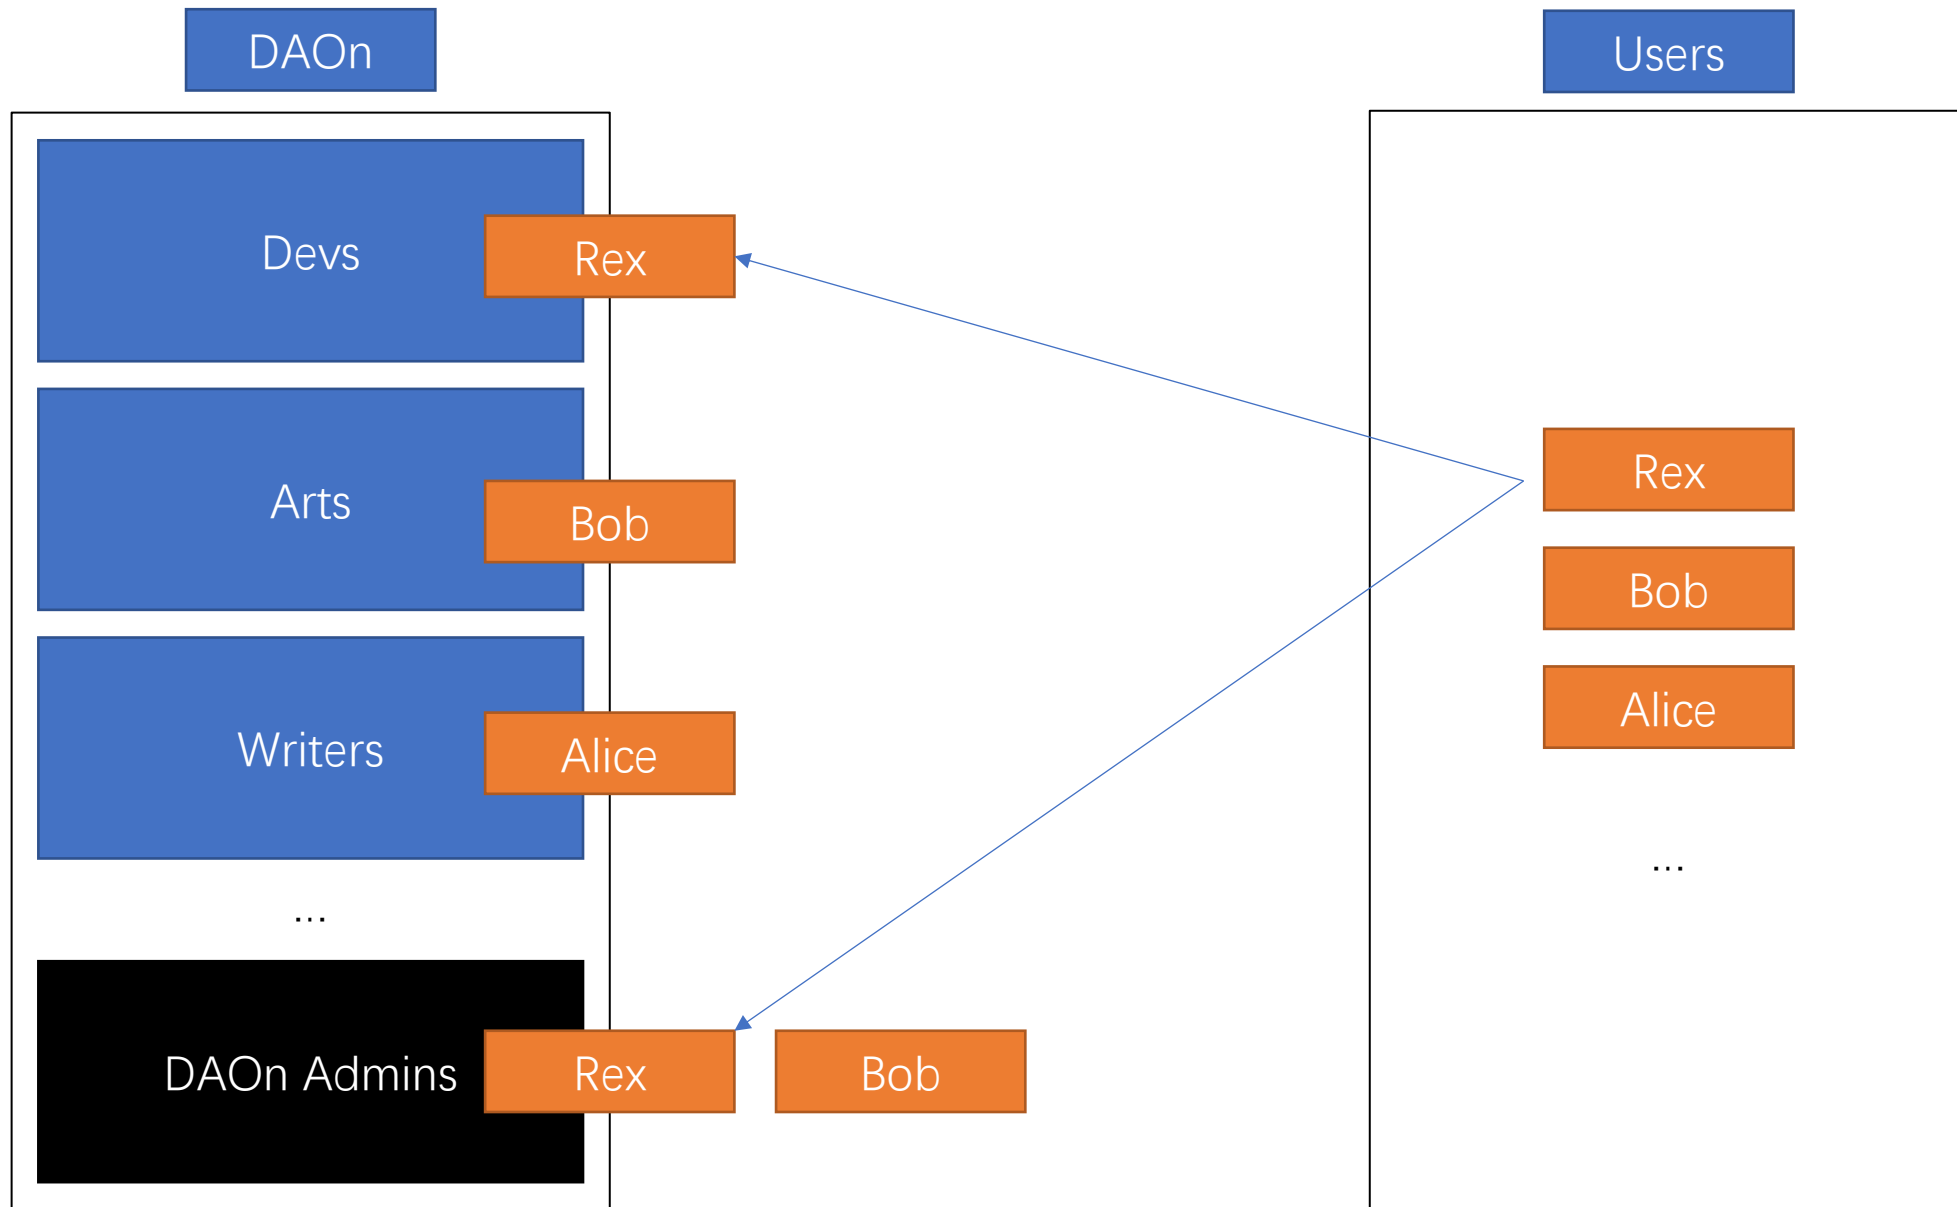

DAOs

Users

Special team to maintain DAOOn List

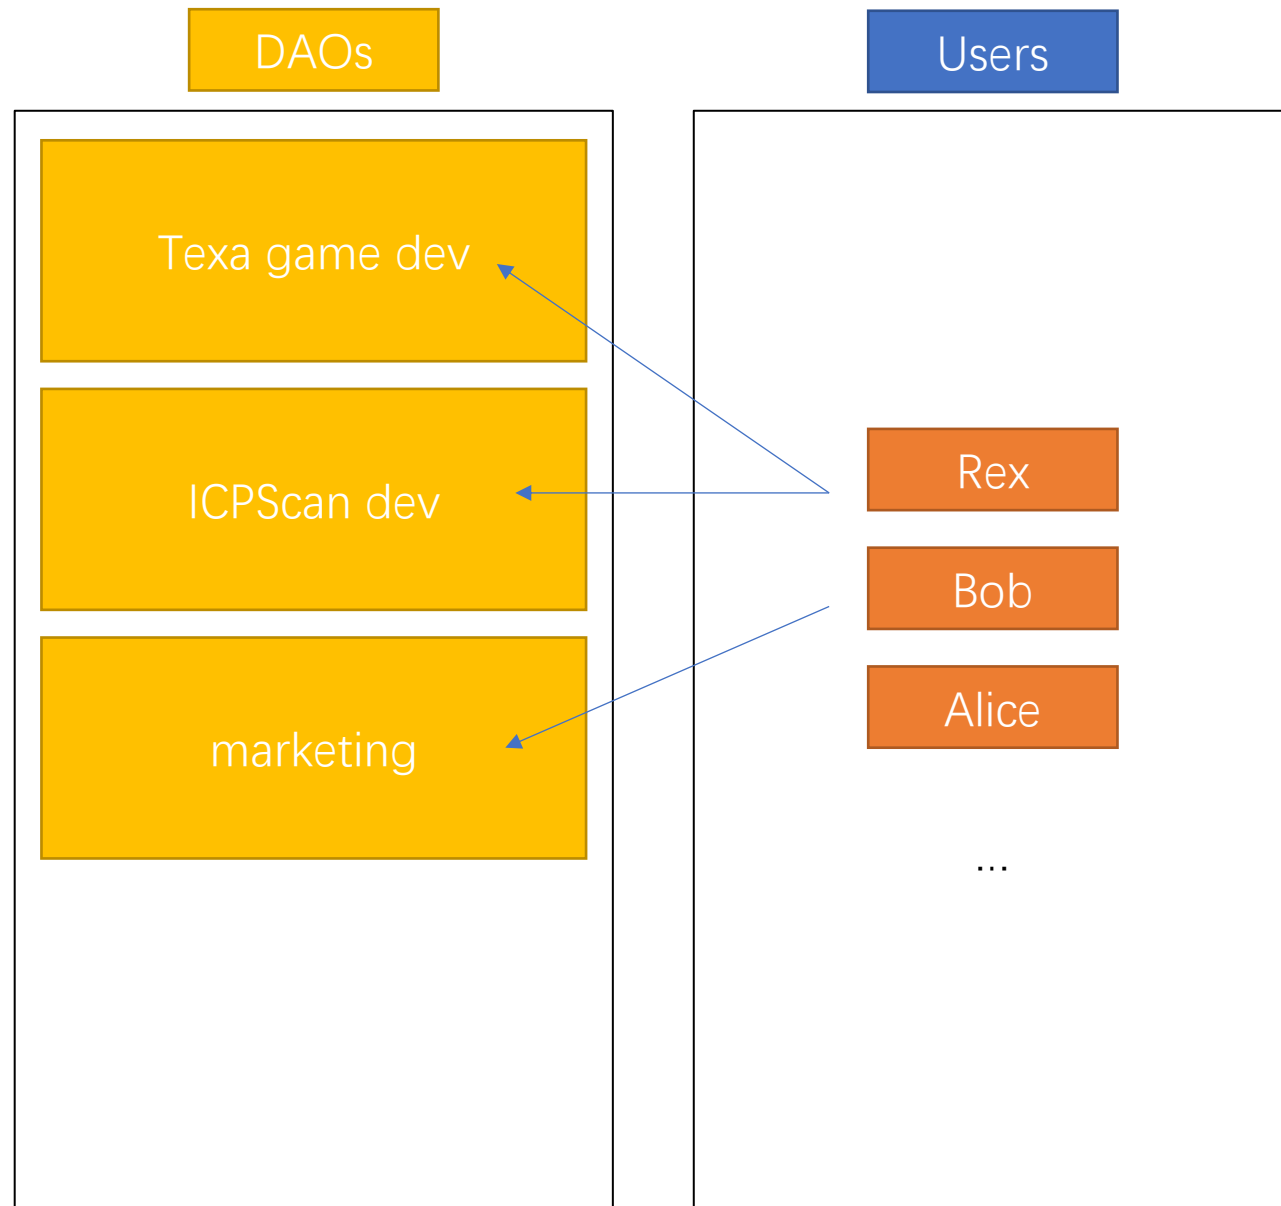

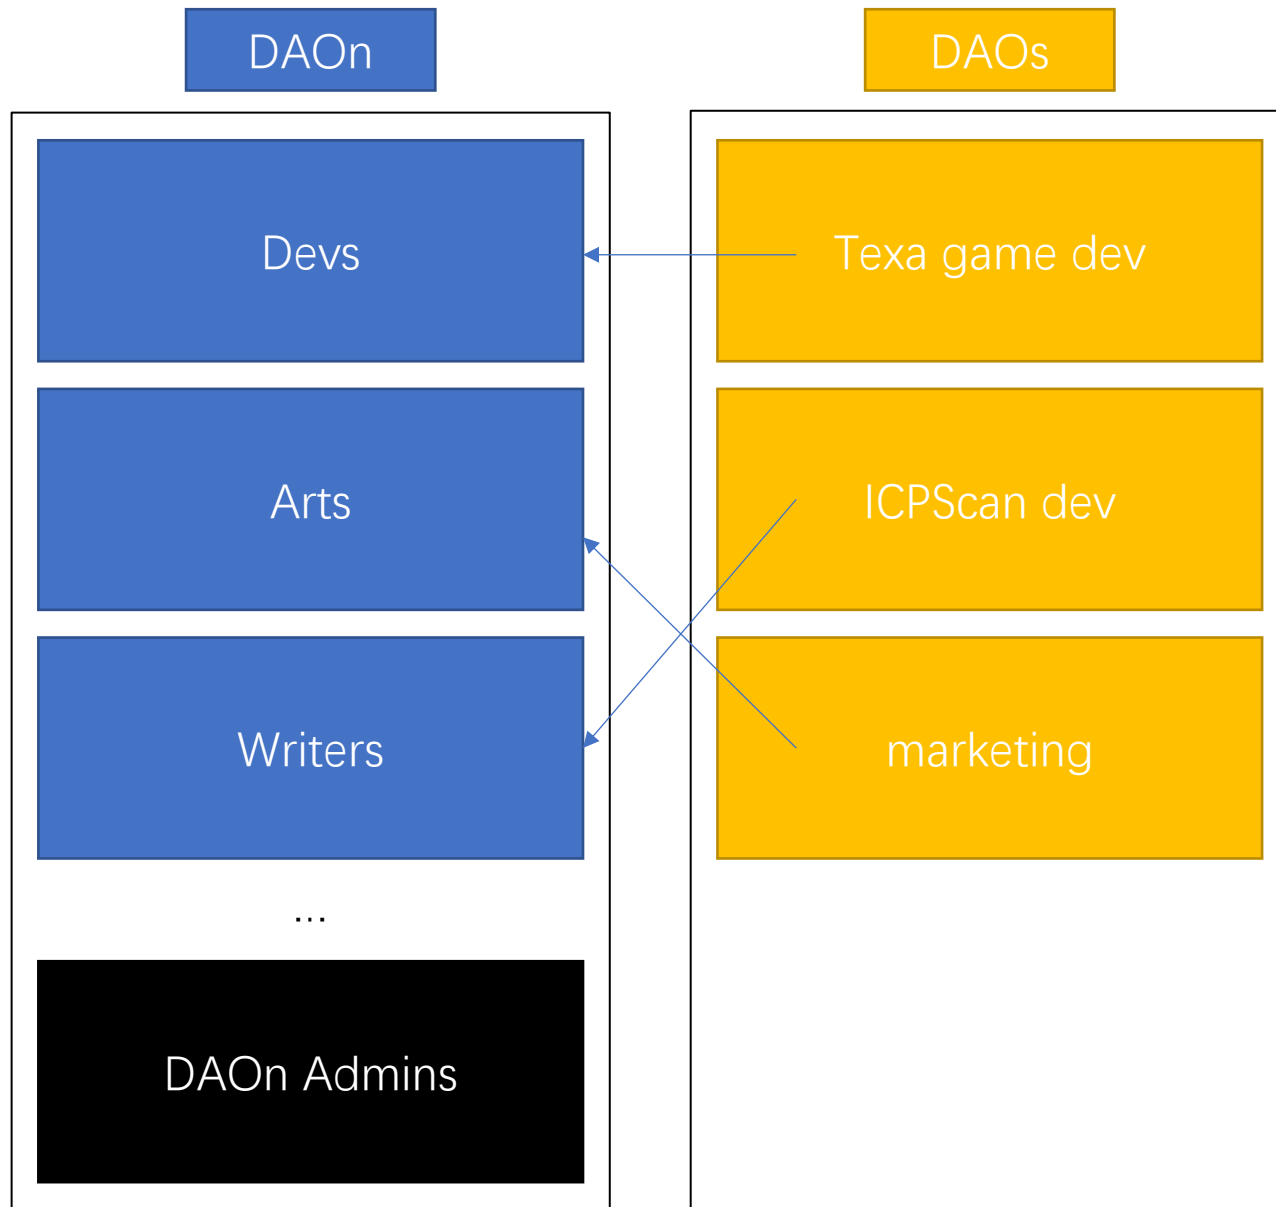

DAOs Is the smallest unit of voting

Everyone can join a trade union in their field of expertise, and gain prestige as their contribution grows. The higher the prestige, the more voting rights.

Everyone can put forward their own ideas and contribute to the community. Every new project will be sponsored by the community at every stage from the idea to the implementation.

You can also join projects created by others, complete them together, and get rewards together.

The project can request the help of professionals from various functional circles to jointly complete the product.

When you need to vote, you can vote for people in a certain field, so as to avoid invalid votes as much as possible.

If needed, DAOn can split into some small DAOns

DAOn

Users

All NDP holders decide who can maintain DAO List

As more and more people join, the ecology will get better and better, and the rewards will also increase.
