01

Derivatives aggregation

Interaction between different platforms, such as reputation and NFTs collateral lending, can be achieved by following the IC protocol.

02

Content Production

NFTs such as user creations, podcast platforms, and game props.

03

Eco-Cross-Chain

With the advantage of IC, it can connect to mainstream public chains such as Bitcoin and ETH in the future.

04

Creation, trading rewards

All collections now generate trading rewards. No minimum volume required - you earn NDP/ICP every time your buy or sell an NFT on ICmarket, from any collection!

Our Advantages:

1. Icpscan and ICTexas have over 10,000 cumulative users.
2. The product matrix is constantly improving and expanding the user base, Icpdrops, Icptree, ICPodcast, Universe and other products are being accelerated.
3. We have received official support from Dfinity's dual Grants, Texas and Icpscan.
4. A new virtual credit system for the WEB 3.0 era to achieve DAO governance.
5. NFTs, Marketplace and other trading markets will all be launched by the end of the year, and Texas games will be partially profitable.
6. Based on the credit system, new scenarios such as GameFi chip collateral lending and DeSo anonymous social will be launched in the future.

NnsDAO grows the sustainability and scalability of the platform by connecting the IC ecology with II and implementing different DAO governance.
